# CONTENTS

## MATHEMATICAL MODELLING IN SCIENCE AND TECHNOLOGY

*THE SIXTH INTERNATIONAL CONFERENCE*

Objective and Organizing Committee xv

Foreword xvii
**Ervin Y. Rodin** and **Xavier J. R. Avula**

PLENARY LECTURES

Are economic forecasts any good?
**Murray L. Weidenbaum** and **Stephen C. Vogt** 1

Design of thyroxine replacement therapy with SCoP and SCoPfit
**Michael C. Kohn** 6

Population system control
**Jian Song, Deyong Kong** and **Jingyuan Yu** 11

Introduction of plenary speaker Dr Jeffrey Marsh
**Ronald G. Evens** 17

MODELLING CHEMICAL SYSTEMS I

Statistical modeling of fluid–solid reactions in porous media
**Muhammad Sahimi, Theodore T. Tsotsis** and **George R. Gavalas** 19

Use of preconditioned bi-conjugate gradient method in modeling two-phase fluid flow in porous media
**David H. Anderson** and **Ajit V. Sapre** 22

Modelling hysterisis phenomena in systems of multiple slits: application of the principle of a minimum rate of entropy production at steady state
**Richard A. Holub, P. A. Ramachandran** and **M. P. Duduković** 26

Variable parameter model of the continuous flow vessel
**Antti J. Niemi** 32

Determination of binary gas diffusion coefficients in spherical porous media by steady and unsteady-state analysis of single pellet reactor data
**S. P. Waldram, P. L. Mills** and **M. P. Duduković** 38

Monte Carlo simulations of liquid flow patterns in trickle-beds
**Badreddine Ahtchi-Ali** and **Henrik Pedersen** 43

MODELLING ON PARALLEL COMPUTERS

Subchannel analysis on advanced computer architectures
**John A. Turner** and **J. Michael Doster** 47

Plasma particle simulations on the Mark III Hypercube
**Paulett C. Liewer, Viktor K. Decyk, John D. Dawson** and **Geoffrey C. Fox** 53

Numerical algorithms for the hypercube concurrent processor
**Jean E. Patterson, Farzin Manshadi, Ruel H. Calalo, Paulett C. Liewer, William A. Imbriale** and **James R. Lyons** 55

OCEAN ACOUSTIC MODELS FOR NAVY APPLICATIONS

A model of underwater acoustic propagation
**Eutiquio C. Young** and **Ding Lee** 58

Three-dimensional sound fields in the ocean
**Michael J. Buckingham** 62

Performance modeling for hydrophone arrays
**Ronald R. Lambert** and **Steven F. Magruder** 67

A finite element model for ocean acoustic propagation
**Joseph E. Murphy** and **Stanley A. Chin-Bing** 70

An $N$-th order Neumann series solution to the Helmholtz surface integral equation for scattering from rough interfaces including shadowing, penetration, and sequential surface scattering
**Richard S. Keiffer** and **Michael F. Werby** 75

Some numerical approaches to describe acoustical scattering from objects in a waveguide
**Guy V. Norton** and **M. F. Werby** 81

NUMERICAL METHODS IN WATER RESOURCES

Storm surge simulation using new FEMA model
**Joseph N. Suhayda** and **Myron H. Young** 87
Vertical slice numerical model for density-driven coastal currents
**Myron H. Young** and **Stephen P. Murray** 96

MATHEMATICAL MODELLING IN ELECTRO-OPTICS I

Mathematical modeling of beam reflection, transmission and trapping at nonlinear optical interfaces
**A. Aceves, J. V. Moloney** and **A. C. Newell** 101
Bistable solitons of highly-nonlinear Schrödinger equations in nonlinear optics
**A. E. Kaplan** 106
Bistable solitons: optical switching and large amplification behaviour
**Richard H. Enns, David M. McAvity** and **Sada S. Rangnekar** 112
Two numerical techniques of the analysis of complex dielectric waveguides
**Joseph L. Levy** 118

S-SYSTEMS

Efficient solution of nonlinear models expressed in S-system canonical form
**Douglas H. Irvine** 123
Alternative S-system representations for reversible biochemical pathways
**Albert Sorribas** 129
Estimation and simulation of S-systems
**Thomas Johnson** 134
Recasting nonlinear models as S-systems
**Eberhard O. Voit** 140

MATHEMATICAL MODELLING IN HEALTH RISK ASSESSMENT

The use of mathematical models in carcinogenesis risk assessment
**Ralph L. Kodell** 146

BIOMECHANICS OF HEART VALVES

A nonlinear finite element stress analysis of the leaflets of a prosthetic heart valve
**Siddik Ozpetek** and **C. Barclay Gilpin** 152
A Bayes model for automatic detection and quantification of bioprosthetic valve degeneration
**L. G. Durand, M. Blanchard, H. N. Sabbah, M. S. Hamid, S. R. Kemp** and **P. D. Stein** 158

CELL MODELS

Cellular aging rates and biochemical reaction rates
**Pierre M. Auger** 164

COMPUTATIONAL FLUID DYNAMICS

Two-dimensional multifrequency instability suppression via surface mass transfer: linear theory and its application
**W. W. Bower, A. Pal, A. B. Cain** and **G. H. Meyer** 170
A computational model for a symmetric turbulent wake
**Sastry S. Munukutla** 175
Numerical simulation of three phase porous flow under shock conditions
**E. J. Kansa** 180

MAGNETICS

Numerical techniques applied to magnetic recording
**Edward Della Torre** and **György Kádár** 186
Mesh generation for modelling in magnetics
**Zoltan J. Cendes, Edward C. Smetak** and **David Shenton** 192

The extraction of engineering parameters from mathematical models of electromagnetic devices
**D. A. Lowther** 197
Mathematical modeling of seed mixing in magnetohydrodynamic power generators
**Shawky E. Shamma** 202

TOPICS IN THEORY OF THE ANALYTIC HIERARCHY PROCESS

Opportunities and limitations of AHP in multiobjective programming
**David L. Olson** 206

GRAPH THEORETIC AND OTHER MODELS

Applications of the theory of hypergroups
**Rupert Lasser** 210
On the galactic number of a hypercube
**Michael Fellows, Mark Hoover** and **Frank Harary** 212
Spanning subgraphs of a hypercube II: double starlike trees
**Frank Harary** and **Martin Lewinter** 216
Modelling properties of spanning trees: diameter and distance sum
**Michael J. Plantholt** 218
Embeddings in hypercubes
**Marilynn Livingston** and **Quentin F. Stout** 222
Model reduction with alternatives to the standard Hankel matrix
**Stefan Mittnik** 228

MATHEMATICAL MODELLING IN CARDIOLOGY

Models and concepts of diastolic mechanics: pitfalls in their misapplication
**Ares Pasipoularides** and **Israel Mirsky** 232
An expert system to simulate fuzzy phenomena in cardiac electrophysiology
**Willem R. M. Dassen** and **William P. S. Van Braam** 235
Left ventricular myocardial stiffness
**Peter B. Kurnik, Michael R. Courtois** and **Philip A. Ludbrook** 239

POPULATION MODELS I

Epidemiologic modelling of diseases—a case example using Schistosoma and Trypanosoma
**T. Habtemariam, A. Ghartey-Tagoe, E. Mamo** and **V. Robnett** 244

POPULATION MODELS II

Saturation processes
**C. O. A. Ṣowunmi** 250

THE P-VERSION OF THE FINITE ELEMENT METHOD: THEORY AND APPLICATIONS

On the use of estimated structural equations for prediction: some empirical results
**Saleh Amirkhalkhali** and **Abbas Naini** 253
Computation of eigenvalues and eigenfunctions for the stress singularity in a composite wedge
**Xingren Ying** and **I. Norman Katz** 256

APPLICATIONS OF THE AHP

An expert support system for R&D project selection
**Matthew J. Liberatore** 260
Using analytic hierarchies for consumer research and market modeling
**Rick G. Schwartz** and **Shmuel S. Oren** 266

MULTIPLE OBJECTIVE DECISION MAKING MODELS AND APPLICATIONS

Using the Analytical Hierarchy Process to select a financing instrument for a foreign investment
**Aboubaker S. Meziani** and **Farahmand Rezvani** 272
Multi-criteria decision making approach to computer software evaluation: application of the Analytical Hierarchy Process
**Manoochehr Toshtzar** 276

Model selection and ranking: an AHP approach to forecasts combination
**Quang Phuc Duong** 282

MODELLING AEROELASTIC PHENOMENA

Analytical modeling of helicopter static and dynamic induced velocity in GRASP
**Donald L. Kunz** and **Dewey H. Hodges** 286
Modeling of unsteady aerodynamics for rotary-wing aeroelasticity
**David A. Peters** 293

MATHEMATICAL MODELLING IN ELECTRO-OPTICS II

Numerical modelling of laser instabilities
**Lee W. Casperson** 298
Travelling wave treatment of mode-locked semiconductor lasers
**Jianguo Chen** and **Dayi Li** 303
Modelling the gain of a diode-pumped solid state laser
**Richard C. Mayer** and **Raymond H. Hsu** 308

FINITE ELEMENT MODELLING AND SOLUTION OF INFINITE REGION ELECTROMAGNETIC PROBLEMS

The surface projection approach to vector field calculations
**Henry Hurwitz Jr** 313

MODELLING PROBLEMS IN LARGE ELECTRIC-POWER SYSTEMS

Applications of integral manifolds to power system studies
**P. W. Sauer** 317
Application of Levinson algorithm for fault calculations in high phase order transmission systems
**A. Chandrasekaran** and **R. P. Broadwater** 321
A multi-level graded-precision model of large scale power systems for fast parallel computation
**G. Huang, A. Abur** and **W. K. Tsai** 325

BIOMECHANICS I

Stress singularities in the elastic analysis of the tibial component of orthopedic implant
**A. B. Strickland** and **T. P. Andriacchi** 331
Head–spine model evaluation of energy absorbing effectiveness of two helicopter crew seats
**Eberhardt Privitzer** 335
A mathematical taxonomy to evaluate the biomechanical quality of the human foot
**Philip H. Demp** 341

NEURAL MODELS I

A hierarchical model of neocortical synaptic organization
**J. P. Sutton, J. S. Beis** and **L. E. H. Trainor** 346

CELLULAR AUTOMATA TO APPLICATION

Information processing in cellular automata
**Jonathan Doner** 351
Bus versus cellular automata, and ultimate limitations of parallel processing
**Jerome Rothstein** 357
The emptiness problem for CA limit sets
**Karel Culik II** and **Sheng Yu** 363
The power of totalistic cellular automata and totalistic systolic networks
**Karel Culik II** 367

MODELLING AND SIMULATION OF CHEMICAL ENGINEERING SYSTEMS II

Sequential bifurcations, maximum multiplicity, and chaos for a first order reaction
**David G. Retzloff, Paul C-H. Chan** and **B. Youssef Bisbis** 370
Mathematical modelling of chemical engineering systems by finite element analysis using PDE-PROTRAN
**P. L. Mills** and **P. A. Ramachandran** 375

Contents

Interfacial turbulence: mass transfer—gas/gas
**Winston Khan** 380
Estimating functional relationships in a macrosociological model
**Richard Bronson, Chanoch Jacobsen** and **James Crawford** 386
A production forecasting model for gas wells
**K. Aminian** and **S. Ameri** 391
The Bayesian learning model of expectations as a solution to the Lucas critique: some empirical evidence
**J. A. Mills** 396

MACROECONOMETRIC MODELLING

Modelling of R & D induced product innovation
**Stephen L. Chan** and **Fredric Raines** 402

KNOWLEDGE BASED GUIDANCE AND CONTROL

Declarative knowledge to use declarative knowledge
**Jacques Pitrat** 408
A multiple-objective optimal exploration strategy
**George Christakos** and **Ricardo A. Olea** 413

BIOMECHANICS II

The statistical use of Fourier descriptors
**Charles B. Davis** and **Robert M. Beecher** 419
Strain energy based equilibrium model of lumbar spine
**Narayan Yoganandan, Joel B. Myklebust, Frank Pintar** and **Anthony Sances Jr** 425
Mathematical modeling of the Hybrid III manikin head–neck structure
**Brian J. Doherty** and **Jacqueline G. Paver** 430
Simulation of body motion during aircraft ejection
**Louise A. Obergefell** and **Ints Kaleps** 436
Modeling of occupant–roof interaction in an automobile rollover
**Narayan Yoganandan, A. Almusallam, Joel Myklebust** and **Anthony Sances Jr** 440

CANCER MODELS

A nonhomogeneous two-stage model of carcinogenesis
**W. Y. Tan** and **C. C. Brown** 445
A mathematical model of survival in relation to age and sex of cancer patients
**Jian C. Chang** 449
A mathematical model of tumor growth by diffusion
**John A. Adam** 455

THEORETICAL ISSUES OF BIOLOGICAL INTELLIGENCE: INFORMATION AND STRUCTURE

Statistical mechanics of mesoscales in neocortex and in command, control and communications ($C^3$)
**Lester Ingber** 457

NONLINEAR AND PHILOSOPHICAL ISSUES IN BIOLOGICAL MODELLING

When is a mechanism not a mechanism? The network thermodynamic approach to complex systems
**D. C. Mikulecky** 464
Analysis of diffusion problems in physiology
**J. B. Garner** 469
On the evolution of altruism in an age-structured population
**Ying-Hen Hsieh** 472

NONLINEAR STOCHASTIC DYNAMICAL SYSTEMS

A software package for hidden Markov modelling
**Robert H. Baran** 476
Steady state solution and convergence rate of time-dependent Markov chains of queuing networks
**K. P. Chung** 481
On the solution of first order evolution problems in continuum physics
**Ida Bonzani** 486

OPTIMIZATION OF BIOLOGICAL PROCESSES

A new numerical method applied to biomedical systems
**Y. Cherruault** 490

Simulation and stability analysis for parameter dependent 2-dimensional models of air polluted forests
**Wolfgang Metzler** and **Dieter Gockert** 493

Model of social consciousness with applications to personal exchange and energy/environment decisions
**John A. Sorrentino Jr** 499

MODELLING APPLICATIONS IN AGRICULTURAL ENGINEERING

Combine model for grain threshing
**J. M. Gregory** 506

Mathematical models describing the flow of granular material
**C. B. Fedler** 510

Engine model for mapping BSFC contours
**C. E. Goering** and **H. Cho** 514

The nitrogen loss in drained soils
**Rameshwar S. Kanwar** 519

Stochastic modeling of granular flow in seed sorting
**Carmine C. Balascio, Manjit K. Misra** and **Howard P. Johnson** 523

LIE METHODS IN MATHEMATICAL MODELLING

Difference equation models of differential equations
**Ronald E. Mickens** 528

Similarity solutions of nonlinear partial differential equations invariant to a family of affine groups
**Lawrence Dresner** 531

Lie group theory applied to the nonlinear Vlasov–Maxwell equations in one and three dimensions
**D. A. Roberts** 535

DEVELOPMENT AND IMPLEMENTATION OF OPTIMIZATION ALGORITHM FOR SMALL COMPUTERS

Prototype simulation and animation on small computers
**William Perrizo** and **Blair Koch** 540

Introduction to S-systems and the underlying power-law formalism
**Michael A. Savageau** 546

Accuracy & error analysis of LP software on microcomputers
**Bryant Bynum** and **Ramesh Sharda** 552

The development of a microcomputer based system for vehicle routing and scheduling and its use for solving spatial and temporal problems
**Lawrence D. Bodin** and **Daryl J. Salamone** 558

MATHEMATICAL MODELLING AND ANALYSIS FOR THE AIR FORCE

Mathematical models of electrohydraulic servovalves for fly-by-wire flight control systems
**Giovanni Jacazio** and **Lorenzo Borello** 563

Mathematical modeling of liquid-rocket combustion instability
**M. A. Farvin** and **John Peddieson Jr** 570

Encoding images through transition probabilities
**Marc A. Berger** 575

CONTROL THEORY

Measuring drug performance with a new optimization algorithm
**William Conley** and **Harriet Wichowski** 578

A simple approach to nonlinear estimation of physical systems
**George Christakos** 583

Toward optimal scaling in the Method of Abstract Forces for interactive multiple criteria optimization
**Roy J. Clinton** and **Marvin D. Troutt** 589

An optimal repair cost limit policy for servicing warranty
**D. N. P. Murthy** and **D. G. Nguyen** 595

On the reduction of total uncertainty in measurements
**Carlos Ford-Livene** and **Tadao Mukaihata** 600

PHYSIOLOGICAL MODELS I

Fitting density functions and diffusion tensors to three-dimensional drug transport within brain tissue
**Yves Nievergelt** 606
Analysis of the pharmacokinetic body transport function
**J. M. van Rossum, G. van Lingen** and **R. A. A. Maes** 610
Mathematical modelling of the renal concentrating mechanism
**Raymond Mejia** 615
Physiologic modelling of MM creatine kinase isoforms
**Dana R. Abendschein, Héctor L. Fontanet, Joanne Markham** and **Burton E. Sobel** 621

MODELLING IN DRUG DESIGN I

Looking for buried treasures: the search for new drug leads in large chemical databases
**G. M. Maggiora, M. A. Johnson, M. S. Lajiness, A. B. Miller** and **T. R. Hagadone** 626
A characterization of molecular similarity methods for property prediction
**Mark Johnson, Subhash Basak** and **Gerald Maggiora** 630
A new approach to structure–activity using distance information content of graph vertices, a study with phenylalkylamines
**G. Klopman, C. Raychaudhury** and **R. V. Henderson** 635
On non-symmetry equivalence
**M. Randić, S. El-Basil** and **R. B. King** 641
The use of mathematical logics in drug design
**W. J. Streich, S. Hübel** and **R. Franke** 647

APPLICATIONS OF THE TAU METHOD TO PROBLEMS IN MATHEMATICAL MODELLING

A survey of recent applications of the Tau Method to problems in mathematical modelling
**Eduardo L. Ortiz** 652
Vector Collocation–Tau Method for linear partial differential equations
**John C. Mason** and **G. Oluṛemi Ọlaọfẹ** 656
Quadrature solution of ordinary and partial differential equations
**G. Oluṛemi Ọlaọfẹ** and **John C. Mason** 661
On different formulations of the Tau Method
**Christian Cabos** 667
Numerical solution of differential eigenvalue problems with variable coefficients with the Tau–Collocation Method
**K. M. Liu** 672
Existence and uniqueness of solution of Bessel's nonlinear differential equation
**A. Pham Ngoc Dinh** 676
Numerical approximations of certain generalised integrals
**Ravindra Kumar** 679

DEFENSE ANALYSIS

From deterrence to defense: the strategic implications of SDI
**Steven J. Brams** and **D. Marc Kilgour** 683
Instructional aid for tactical wargame model
**S. Ramgopal, B. T. Vikram Kumar, N. C. Shivaprakash** and **R. Vasudevan** 689
Military modelling and computing: where do we go from here?
**Harriet H. Kagiwada** 693
Modification of the viscosity solution and its application
**Leszek Saturnin Zaremba** 699

MODELLING SOLID MATERIAL BEHAVIOR

Mathematical modelling of materials behaviour
**Josef Betten** 702
The modelling of aging processes in aerospace materials
**D. T. Wadiak** 709
A mathematical model for nonlinear stress analysis of sandwich plate units
**Yellappa C. Das** and **C. V. Girija Vallabhan** 713

A simple computational cumulative damage model for microcracking
**Stuart McHugh** 720
On the characteristics of bolted joints of the orthotropic materials (Part I)
**Debabrata Ray** and **N. R. Chakraborty** 727
On the characteristics of bolted joints of the orthotropic materials (Part II)
**Debabrata Ray** and **N. R. Chakraborty** 730

SYSTEM THEORETIC MODELS IN ECONOMIC MODELLING

A note on integrating the input price distortion policy into the general equilibrium impact analysis
**Fengshiuan (Florence) Pan Shu** 734
Can the world be studied in the viewpoint of systems??
**Yi Lin** 738
The coding theorem and ordinary least-squares models in economics
**William D. O'Neill** 743

HEAT TRANSFER AND FLUID MECHANICS

Non linear diffusion equations in heterogeneous media
**Michel Artola** 747
A mathematical model of impulse jet mechanism
**K. F. Teng** 751

INFORMATION SYSTEMS

A performance model of database systems under arbitrary data access distribution
**Mukesh Singhal** and **Yelena Yesha** 754
Stochastic models of information obsolescence
**James P. Coughlin** and **Robert H. Baran** 760
Multi . . . multi-ordered telematics: Tele((Comm)Infor)Matics
**Robert K. Krzywiec** 766
Multi . . . multi-graphs of Programable 1. Programing Languages: FORTRAN 77
**Robert K. Krzywiec** 772

PHYSIOLOGICAL MODELS II

Activation dynamics for a distribution–moment model of skeletal muscle
**Shiping Ma** and **George I. Zahalak** 778
Pharmacokinetic modeling of warfarin: a multifactorial approach
**Walter D. Wosilait** and **Richard H. Luecke** 783
Data sensitivity of estimated parameters in a seven-compartment model for pharmacokinetics
**F. W. Schultz** and **J. A. Mulder** 786
Application of multivariate autoregressive modelling for analysis of immunologic networks in man
**Takao Wada, Hirotugu Akaike, Haruyasu Yamada** and **Eiichi Udagawa** 792
Mucus transport in the lung
**Manju Agarwal** and **J. B. Shukla** 797

MODELLING IN CARDIOLOGY

Finite element approximation of potential gradient in cardiac muscle undergoing stimulation
**Wanda Krassowska, David W. Frazier, Theo C. Pilkington** and **Raymond E. Ideker** 801
Measurement of myocardial blood flow with positron emission tomography: correction for count spillover and partial volume effects
**Pilar Herrero, Joanne Markham, Donald W. Myears, Carla J. Weinheimer** and **Steven R. Bergmann** 807
Computer simulation of ventricular fibrillation
**Pierre M. Auger, Alain Bardou, Alain Coulombe** and **Jean Degonde** 813
An animated, non-compensating pulmonary model for teaching ventilation and perfusion relationships to medical students
**Bruce L. Johns, Alan D. Scott** and **David J. Thuente** 823

MODELLING OF BRAIN SYSTEMS

Wave disturbances in laminar nerve networks
**J. B. Willis** 828

Information transfer in the cortex
**T. Triffet** and **H. S. Green** 832

MODELLING IN DRUG DESIGN II

An approach to modeling the mutagenicity of nitroarenes
**M. Randić, S. C. Grossman, B. Jerman-Blažič, D. H. Rouvray** and **S. El-Basil** 837
QSAR approach to the prediction of melting points of substituted anilines
**J. C. Dearden** and **M. H. Rahman** 843

MODELLING OF LARGE SCALE SYSTEMS

Partitioning and parallel algorithms for kidney models
**T. M. Hagstrom** and **R. P. Tewarson** 847
A stiff ODE solver for use in solving two-dimensional reaction–diffusion problems
**Douglas E. Salane** 850
New methods for boundary value problems
**Robert E. Kalaba** and **Anthony S. Wexler** 855
Simulation of integrated circuits: numerical techniques
**Peter Lory** 858
Modelling atmospheric water vapor fluctuations for radio interferometry
**R. N. Treuhaft** and **G. E. Lanyi** 864

MATHEMATICAL MODELLING PROBLEMS IN AEROSPACE

Simulation of multiple aircraft information, communication, and decision in air combat
**Stephen L. Chan** and **Barbara J. Vogel** 865
Prediction of loaded airfoil unsteady aerodynamic gust response by a locally analytical method
**Hsiao-Wei D. Chiang** and **Sanford Fleeter** 871
Locally analytical prediction of the steady inviscid incompressible flow through an airfoil cascade
**Hsiao-Wei D. Chiang** and **Sanford Fleeter** 877
Recent work using Volterra series as a methodology to analyze nonlinear aircraft dynamic properties
**W. T. Baumann, T. L. Herdman, H. Stalford** and **C. F. Suchomel** 883

MATHEMATICAL MODELLING IN NATURAL RESOURCES ECONOMICS

Dynamic duality in resource economics: theory and empirical usefulness
**Pierre Lasserre** 889
Ore quality selection and the supply response to nonrenewable resource taxation
**Jeffrey A. Krautkraemer** 894
When more isn't better: information and common-property resources
**Joseph Swierzbinski** 899
A comparison of Bertrand and Cournot equilibrium outcomes in a differentiated nonrenewable resources duopoly
**Gérard Gaudet** and **Michel Moreaux** 903
Effects of ecological and environmental gradients on coexistence of interacting species
**J. B. Shukla, O. P. Misra, S. Gakkhar** and **M. Agarwal** 907
Effect of pollution and industrial development on degration of biomass-resource: a mathematical model with reference to Doon Valley
**J. B. Shukla, O. P. Misra, M. Agarwal** and **A. Shukla** 910

DEVELOPMENT AND IMPLEMENTATION OF OPTIMIZATION ALGORITHMS FOR SMALL COMPUTERS

Optimizing subcase solutions for (M, N)-transitivity
**Alfred J. Boals** and **Kenneth L. Williams** 914
An optimal data allocation model for distributed databases
**Dalia Motzkin** 920

TECHNOLOGICAL SYSTEMS AND MODELLING

A mathematical model for plasto-hydrodynamic drawing of narrow strips
**G. R. Symmons, A. H. Memon** and **M. S. J. Hashmi** 926
Track irregularity limits from consideration of track–vehicle interaction
**N. Ananthanarayana** 932

A data focusing algorithm with monotone regression and positive semi-definite constraint features
**Marvin D. Troutt** 936
Estimation of the linear programming technological coefficient matrix by a principle of maximum efficiency
**Marvin D. Troutt** 941
Vehicle suspension optimization
**P. Pintado** and **F. G. Benitez** 946
A computer simulation of a multiple track rail network
**Samuel M. Graff** and **Peter Shenkin** 950
Analysis of sintering process by the mathematical model
**Juzo Shibata** 956
Development of parameters of multinomial logit models
**Snehamay Khasnabis** and **Michael J. Cynecki** 962
Interaction factors in synchronous machine modelling
**K. A. S. Alukaidey** and **E. H. T. El-Shirbeeny** 969

SIMULATION AND MODELLING

Continuous time stochastic compartmental models of discrete populations
**Richard L. Patterson** 975
Methods of nonequilibrium statistical mechanics in molecular simulations
**Miroslav Grmela** 979
Simulation of rheological properties of polymeric fluids
**J. Stastna** and **D. De Kee** 985
A mathematical model and simulation of frequency hopping interferences to FM systems
**Ghulam H. Raz** 988
Stationarity in models of successive stochastic phenomena
**Michael Tortorella** 994
Adaptive transversal filter modeling and simulation for telecommunications
**W. E. Mattis** 1000

SOLID MECHANICS

Computer-aided appreciation of bridge–track–vehicle interaction
**Sharat K. Sinha** 1006
Modelling, analysis and testing of dissipative beam joints—experiments and data smoothing
**Goong Chen, Steven G. Krantz, David L. Russell, C. Eugene Wayne, Harry H. West** and **Jianxin Zhou** 1011
Modification of Swift criterion by damage mechanics and its application to theoretical analysis of forming limit
**Zhirong Guo** and **Hui jun Tan** 1017
The effect of energy dissipation due to friction at the joint of a simple beam structure
**Robert P. Donnelly Jr** and **Ronald L. Hinrichsen** 1022
Nonlinear deformations of clamped annular membranes subjected to uniformly distributed axisymmetric loading
**F. W. Workman, Joseph D'Costa** and **Ajit D. Kelkar** 1028

RADIATION MODELLING

Combining plans in radiotherapy treatment planning
**Yair Censor, Martin D. Altschuler, William D. Powlis** and **Morton M. Kligerman** 1035
Response-surface model for organ dysfunction after protracted irradiation
**B. R. Scott** 1038
Local stem cell depletion model for radiation myelitis
**Robert J. Yaes** and **André Kalend** 1041
On a limited angle model for CT scan
**Pablo M. Salzberg** and **Carlos Steffens** 1047

MODELLING NAVAL OPERATIONS

Acoustic source bearing modeling in shallow water waveguides
**Er-chang Shang** and **Yun-yu Wang** 1052
The optimality of radial flight
**Peter P. Andre** 1056

Contents

MATHEMATICAL MODELLING IN ENVIRONMENTAL DECISION-MAKING

Technical modeling for policy making: integrated modeling of a large environmental system
**Ronald J. Marnicio** and **Edward S. Rubin** 1059
Analysis of turbulent dense jets discharged to quiescent uniform or stratified ambients
**I. K. Madni** and **S. Z. Ahmad** 1064
Optimization modeling for capacity planning of production facilities and alternative facilities with consumable capacity
**Brian W. Baetz** and **Eric I. Pas** 1069
Predicting THM concentration in treated water with highly correlated data
**Paul J. Ossenbruggen, Marie Gaudard** and **M. Robin Collins** 1073
Predicting the probability of contamination at groundwater based public drinking supplies
**Jailyn A. Brown** and **William P. Darby** 1077

BOUNDARY ELEMENT TECHNIQUES IN MATHEMATICAL MODELLING

Probabilistic modelling of existing structures for dynamic analysis
**Tai-Yan Kam** 1083

MATHEMATICAL MODELLING IN EDUCATION

Mathematical modelling in secondary schools
**Georgeann M. Kepchar** and **Thomas E. Yager** 1087

COMPUTATIONAL MODELLING

Conservation laws for systems with memory
**Angelo Morro** and **Giacomo Caviglia** 1090
A model for the dynamics of flexible chain systems
**Angelo Morro** and **Mauro Benati** 1093
Estimation of variance and covariance components in linear models containing multiparameter matrices
**John Jones Jr** and **Chiewchar Narathong** 1097
Decisional data and the Principle of Maximum Efficiency Estimation
**M. Diane Pettypool** and **Marvin D. Troutt** 1101
Recent improvements to Data Envelopment Analysis
**M. Diane Pettypool** and **Marvin D. Troutt** 1104
Generating subroutine codes with MACSYMA
**Megan Florence, Stanly Steinberg** and **Patrick Roache** 1107
Model creation and validation using bispectral estimation
**Ernest G. Zenker Jr** 1112
Computation with error injection
**K.-Y. Fung** and **Brian D. Goble** 1116

ROBOTICS AND ENGINEERING MODELLING

Validation of single scatter model for backscatter density gauges
**I. A. Henderson** and **J. McGhee** 1122
A non-linear charge control model for symmetrical pin diodes
**J. McGhee, I. A. Henderson** and **I. Hulley** 1128
Shock stability analysis for parabolized Navier–Stokes equations
**Douglas D. Cline** and **Graham F. Carey** 1133

ENGINEERING SYSTEMS AND METHODOLOGY

Steady-state analysis of three-phase bridge converter supplying an active load
**Yaozhong Xu, V. I. John** and **G. E. Dawson** 1138
Mathematical modeling of planar mechanisms with compliant joints
**Ashraf A. Zeid** 1144
Mathematical models used for adaptive control of machine tools
**Patricia A. S. Ralston** and **Thomas L. Ward** 1151
Generalized least squares innovation representation
**I. Bencsik** and **Gy. Michaletzky** 1156

Viscoelasticity of photopolymer plates and ink hydrodynamics in modelling flexographic printing
**Srinivas K. Mirle** and **A. C. Zettlemoyer** 1162
Modeling of brushless dc drive systems with pulse-width modulated excitation
**René Spée, Alan K. Wallace** and **Joel Davis** 1166
A continuous review inventory system with semi-Markovian demands
**S. Kalpakam** and **G. Arivarignan** 1172
Simulation of mechanical drives with generalized power losses
**Francesco De Bona** and **Giovanni Jacazio** 1178
A lower bound solution for the plane strain extrusion forging process
**M. S. J. Hashmi** 1183

MEDICAL SIMULATION AND MODELLING

On active linear compartments
**Marek Kimmel** and **Ovide Arino** 1189
The determination of nutritional requirements: a mathematical modeling approach
**L. Preston Mercer** and **Steven J. Dodds** 1195
A computer simulation model for cellular migration in planarians
**Richard V. Solé, Jordi Ocaña** and **Jaume Baguñà** 1201
An interactive support software for design and use of simulation packages
**Roderic Guigó** and **Jordi Ocaña** 1205
Bayesian fitness estimation in simulation studies
**Maria del C. Ruiz de Villa** and **Jordi Ocaña** 1208
